

# RING SIZING GUIDE

TO ENSURE THE MOST ACCURATE MEASUREMENT

1. Before printing this, make sure the page scaling is set to "None" in your printer settings area.
2. Measure the line on the left to ensure it's exactly 2 inches.
3. If the measurement isn't accurate, please review your print settings again. Be sure to print full size.

## METHOD #1

1. Carefully cut out the paper sizer below. Be sure to make a small slit in the end for the ruler to slide through.
2. Wrap the sizer around your finger with the numbers facing out and slide the rounded end through the slit.
3. For an accurate measurement, pull the sizer tight over the widest part of your finger. This could be a knuckle.
4. Read the number that lines up next to the slit. This is your ring size!

### **Tips for an accurate measurement:**

- Measure your finger later in the day (when it is at its largest)
- Avoid measuring your finger when it's cold (when it is at its smallest)

## METHOD #2

1. Choose a ring that fits the desired finger.
2. Place the ring over the circles below. Match the inside diameter of the ring with the closest circle.
3. If the ring falls between two sizes, select the quarter size in the middle.

### RING SIZE CONVERSION CHART

Measurements are equivalent to the interior circumference of the corresponding ring size
